Remote Data Backup Services

Do away with those pesky tapes and the possibility of data corruption and loss. No more tapes to store and purchase every year. No more waiting for the tape or DVD to finish backing up your data.

* **Compressed data** transferred monthly to our data server systems, which includes not only files backed up but also files restored. While various files compress at different rates, expect an overall compression level of approximately 50%.

We have structured our pricing to fit every size business.

HOME OFFICE BACKUP PLAN OR HOME OWNER BACKUP PLAN BASIC

For typical professionals and home offices or small offices with one to three workstations.
